Professional Experience

Software Engineer, DAZN

Jun 2024 – present | Hyderabad, India

- **Built** Simple Oueue Service to process high throuhput requests.
- **Integrated** new internal service communication with **HMAC** configuration to **protect** data integrity.
- Improved integration testing.

Junior Software Engineer, Vigocare

Dec 2022 – Jun 2024 | Hyderabad, India

- Reduced a MongoDB collection query time from 45sec to 3sec just using projection option, saved 1000's of dollars in caching solution.
- Developed, automated publishing, installation and deletion of a private npm package which resulted in 10x reduction in code repetition and bugs.
- **Integrated** third party video calling service and **developed** all the APIs from scratch.
- Migrated mongoose library for services from v5 to v8, that is 3 major upgrades.
- Improved the performance of an API by 40x, reducing response size from >20MB to <500KB, that was bottlenecked by gRPC.
- Contributed to iOS app occasionally and integrated Core Data and multiple new APIs. Read **my monthly review on my website** of for detailed and updated professional experience.

Skills

- Programming Languages: JavaScript, TypeScript, Python, Swift
- Database: MongoDB, Redis, PostgreSQL, SQLite, DynamoDB
- Frameworks: NodeJS, Django, Flask, SwiftUI
- Messaging Systems: Kafka, SQS
- Tools: Git, Docker, Terraform, Kubernetes
- Cloud Platforms: Amazon Web Services

Projects

SourceCrowd - Discover Real Web

GitHub Repo ☑ | Video Demo ☑

Designed and **built** a web application using Django, where people post links to the webpages that they find helpful, and others can vote based on the quality. They can also add a title and description for that link, based on which others can search for that webpage. It's a crossover of Google Search and Reddit.

Command Line Generative AI

GitHub Repo

A command line **generative AI bot** that can be used directly from the **terminal** without the need for going to a browser. Utilizes Google's Large Language Model(LLM), Gemini Pro.

Network

GitHub Repo ☑ | Video Demo ☑

A full-stack **social networking site** like **Twitter**, for making, deleting, and editing posts. Using Fetch API, implemented following features: like and unlike posts, and follow other users.
